PROFESSIONAL SUMMARY

Full Stack Software Developer with hands-on experience building scalable, AI-powered web applications using React.js, Node.js, FastAPI, and AWS. Skilled in secure authentication, REST APIs, database-driven systems, and Agile development, with proven experience delivering production-ready solutions.

TECHNICAL SKILLS

- **Programming:** JavaScript, TypeScript, Python
- **Frameworks & Tools:** React.js, Next.js, Node.js, Express.js, FastAPI, Laravel, LangChain, LangGraph, Socket.IO, Docker, Git/Github, Redis
- **Web & APIs:** RESTful APIs
- **Databases:** PostgreSQL, MySQL, MongoDB, NeonDB, Supabase
- **Networking & Security:** WebSockets, WebRTC, secure authentication, password hashing, NextAuth, JWT authentication
- **Cloud & Architecture:** AWS, Render, Vercel, Netlify, Railway

PROFESSIONAL EXPERIENCE

Associate Software Developer

[Cyberify, Multan, Pakistan](#)

August 2025 – October 2025 | Open to New Opportunities

AI Recruitment Automation System

- **Requirements:** Automate pre-screening of candidates by evaluating interview responses, validating documents, and notifying shortlisted applicants.
- **Solution:** Built an AI-powered system using LangChain to score and shortlist candidates automatically, extract and verify documents, and send notifications, reducing manual screening effort.
- **Tech Stack:** React.js, FastAPI, PostgreSQL, LangChain, AWS S3

AI Job Discovery & Course Management Platform

- **Requirements:** Centralize and filter job listings, particularly housing scheme-related jobs, and provide course creation and learning material management for users.
- **Solution:** Developed a platform that scrapes, validates, and enriches job listings, while enabling admins to manage courses with secure content uploads using AWS S3.
- **Tech Stack:** React.js, FastAPI, PostgreSQL, LangChain, AWS S3, Beautiful Soup, Selenium

FREELANCE PROJECTS

HolyVibes – Learning Management System (LMS)

- **Requirements:** Develop a scalable role-based LMS enabling admins, teachers, and students to manage classes, meeting links, course content, enrollment, and attendance with secure access control.
- **Solution:** Built a full-stack LMS with automated authentication and role-based workflows, allowing teachers to manage classes and content while students enroll, access sessions, and track attendance efficiently.
- **Tech Stack:** React.js, Laravel, MySQL, Hostinger

Student Management System

- **Requirements:** Manage students, teachers, subjects, attendance, and results with easy data import and export of reports.
- **Solution:** Developed a full-stack system where admins can create teachers, subjects, and students (via Excel import), teachers can add results, attendance coordinator can mark attendance, and administrators can download students' reports.
- **Tech Stack:** React.js, Node.js, MongoDB

eBay Integration – Comic Book Data Automation System

- **Requirements:** Automate the extraction and analysis of out-of-stock comic book listings from eBay with secure user authentication. Extract CGC certification numbers and present ranked results in a structured user interface.
- **Solution:** Designed an automated scraping and processing system using Apify and Regex to extract, structure, and rank comic data, displayed through a dynamic tabular interface with controlled access.
- **Tech Stack:** HTML, CSS, JavaScript, FastAPI, Apify

Vedeera – Employee Attendance & Workforce Management System

- **Requirements:** Develop a secure workforce management system with role-based access control, enabling employee check-in/check-out and real-time attendance monitoring with working hour calculations.
- **Solution:** Built a full-stack system with Firebase Authentication, admin and employee roles, backend hour calculations (gross & net), mobile check-in integration, and deployed scalable infrastructure on AWS.
- **Tech Stack:** React.js, Node.js, PostgreSQL, Firebase Auth, AWS

TripAdvisor-Like Mobile App

- **Requirements:** Build a travel and restaurant discovery mobile app with interactive maps and a trip planner that organizes destinations, visit times, and ride scheduling.
- **Solution:** Developed a cross-platform app with Mapbox integration for maps and a smart trip planner to manage cities, restaurants, visit timing, and ride coordination with backend support.
- **Tech Stack:** React Native, Node.js, Supabase

Musical Keyboards – Music Refining Keyboard

- **Requirements:** Build a web-based virtual musical keyboard where users can select different instruments (e.g., piano, violin) and play single notes or multiple chords (major/minor) interactively.
- **Solution:** Created an interactive keyboard interface integrated with Tone.js to generate instrument-based sounds, enabling users to switch instruments and play multiple chords in real time.
- **Tech Stack:** React.js, Tone.js

PERSONAL PROJECTS

Job-Specific AI Resume Enhancer

- **Requirements:** Optimize user resumes and cover emails for specific job roles added via LinkedIn extension or manual form entry.
- **Solution:** Built an AI-powered web app that generates ATS-friendly, role-specific resumes and professional emails, automating the application workflow for improved candidate visibility.
- **Tech Stack:** Next.js, LangChain, Groq, Puppeteer, UpStash
- **Live URL:** <https://ai-resume-enhancer-mu.vercel.app>

Nexora – AI-Powered SaaS Application

- **Requirements:** Enable users to generate AI-powered chat sessions based on website content with subscription-based access.
- **Solution:** Built a SaaS platform that scrapes and processes website data to create contextual AI conversations, with secure payment handling and scalable real-time interactions.
- **Tech Stack:** React.js, Node.js, LangChain, Groq, Puppeteer, Stripe
- **Live URL:** <https://nexora-seven-rosy.vercel.app>

Connectly – Real-Time Communication Platform

- **Requirements:** Enable real-time one-to-one messaging and video calls with low latency and secure communication.
- **Solution:** Developed a platform using WebRTC for peer-to-peer video calls and Socket.IO for instant messaging, ensuring smooth performance and secure interactions.
- **Tech Stack:** React.js, Node.js, Socket.IO, WebRTC
- **Live URL:** <https://web-rtc-client-one.vercel.app>

EDUCATION

Bachelor of Science in Computer Science (BSCS)

[National Fertilizer Corporation Institute of Engineering & Technology \(NFC-IET\), Multan, Pakistan](#)

Nov 2022 – Jul 2026 (Expected Graduation)

Final Year Project: AI-Based CRO System for E-Commerce Stores (In Progress)

- Developing a RAG-based AI system to analyze e-commerce sites and generate conversion optimization recommendations.
- **Tech Stack:** FastAPI, Python, LangChain, LangGraph, React, Vector Database, Playwright/Selenium, Redis
